AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Complete Listing of Claims:

1. (Currently Amended) A biocidal composition comprising composite particles, each of said composite particles containing a shell and a core, said core consisting essentially of a metal element or metal-containing compound selected from the group consisting of aluminum phosphate, bismuth oxide, iron II oxide, iron III oxide, silver, silver oxide, titanium oxide, zinc, zinc selenide, and zirconium oxide, and said shell consisting essentially of a metal pyrrithione formed by a transchelation reaction of ~~a water-soluble salt of pyrrithione selected from the group consisting of sodium pyrrithione and potassium pyrrithione~~ with a portion of the metal element or metal-containing compound of said core in water.

2.-37. (Canceled)

38. (Currently Amended) A biocidal composition comprising composite particles containing a shell and a core, said core consisting essentially of a metal element or a metal-containing compound selected from the group consisting of aluminum phosphate, bismuth oxide, iron II oxide, iron III oxide, silver, silver oxide, titanium oxide, zinc, zinc selenide, zirconium oxide, and said shell consisting essentially of a metal pyrrithione formed by a transchelation reaction of ~~a water-soluble salt of pyrrithione selected from the group consisting of sodium pyrrithione and potassium pyrrithione~~ with a portion of the metal element or metal-containing compound of said core in water, wherein the particle size for said composite particles ranges from 1 to 20 microns in diameter.

39. (Canceled)

40. (Currently Amended) The composition of claim 1 wherein said shell consists of zinc pyrrithione, and said core consists of zinc or zinc selenide, said zinc pyrrithione being formed by

a transchelation reaction of a ~~water soluble salt of pyrrithione selected from the group consisting of sodium pyrrithione and potassium pyrrithione~~ with a portion of the zinc or zinc selenide from said core.

41. (Currently Amended) The composition of claim 38 wherein said shell consists of zinc pyrrithione, and said core consists of zinc or zinc selenide, said zinc pyrrithione being formed by a transchelation reaction of a ~~water soluble salt of pyrrithione selected from the group consisting of sodium pyrrithione and potassium pyrrithione~~ with a portion of the zinc or zinc selenide from said core.

42-49. (Canceled)

50. (Previously Presented) A biocidal composition comprising composite particles, each of said composite parties containing a shell and a core, said core consisting essentially of zinc or zinc selenide, and said shell consisting essentially of zinc pyrrithione formed by a transchelation reaction of sodium pyrrithione with a portion of the zinc or zinc selenide of said core.

51. (Previously Presented) The biocide composition of claim 50 wherein the particle size for said composite particles ranges from 1 to 20 microns in diameter.

52. (Previously Presented) The biocidal composition of claim 1 wherein the particle size for said composite particles ranges from 1 to 20 microns in diameter.
